

Message Passing Interface: FAQ

Q. Can I use user-defined enum data type as MPI tag?

A. Yes, it will make the program more readable when MPI messages are naturally named, *e.g.*, enum MsgTag {TAG_INIT, TAG_DATA, TAG_RESULT}; with enumerators mapped to integers 0, 1, 2.

Q. How does NCCL (NVIDIA Collective Communication Library) compare to MPI?

A. NCCL (*e.g.*, ncclSend() & ncclRecv()) is for NVIDIA GPU-GPU communication while MPI for general CPU-CPU communication

Q. I cannot find .bashrc in my home directory

A. Please create & edit it using editor
