

Why Assignments Are Too Easy?

A: It's intentional. To provide hands-on seeds, so as to start using tools (MPI, OpenMP, CUDA, SYCL, *etc.*, or other mathematical & engineering tools at large) in a self-sustained use-learn cycle

Most effective way to learn a new tool

Understand
the smallest set
of essential
mechanisms
by reading a
**minimalist
program**

Use the toolkit
to solve **one's
own** problem

Expand the
toolkit by
adding

**Self-sustained
Use-learn cycle**

Start the cycle in your final project

Alternative way

“You bought a 1300+ page (480K+ word) book for \$40 or \$60, not a subscription service. How much support do you expect?”

Learning-Theory Foundation

- **Minimum description length (MDL) theory:** Models described by fewer bits (*i.e.*, low Kolmogorov complexity) are more **generalizable**
- **Spectral theory:** Low-bit (low-complexity) models have **flatter loss landscape**
